This construction product is not a DIY product. For correct and safe installation, this product must be installed by a qualified roofing and/or construction professional. Installation must be carried out in accordance with applicable standard building regulations and the manufacturer's instructions.

By hiring a professional, you ensure correct installation and prevent any damage or problems with the operation of the product. Incorrect installation may result in structural damage and/or reduced performance, for which we are not responsible.

Always follow local building regulations and, if necessary, consult a specialist for additional guidance.

Please note:

Ensure that the installer is familiar with the specifications of the product. Regularly check that all regulations and safety measures are correctly observed during installation. If you have any questions about the installation process, please contact your supplier or manufacturer for assistance.
